Our Lady of the Way Hospital
2019 Community Health Needs Assessment
This Community Health Needs Assessment (CHNA) Implementation Strategy was prepared for Appalachian Regional Healthcare by the Community and Economic Development Initiative of Kentucky (CEDIK) at the University of Kentucky.

CEDIK works with stakeholders to build engaged communities and vibrant economies. If you have questions about the assessment process, contact Melody Nall, CEDIK Extension Specialist: melody.nall@uky.edu or (859) 218-5949.

Dear ARH Service Area Resident,

Thank you for your interest in the 2018-2019 ARH Community Health Needs Assessment (CHNA). The data reflected in this report was collected from surveys, focus groups, and key informant interviews conducted in your local ARH community. These results are being reported along with an update about how we utilized the results from our previous needs assessment from three years ago. The unique design of this CHNA permits an examination of the diverse aspects of each of our 12 ARH communities.

The assessment results from each ARH community demonstrate the desire for individual and community health improvement. These results provide valuable information that will be used by ARH for planning purposes, service improvements and community outreach. Special thanks to the CHNA Community Steering Committees in each of our 12 communities for giving of their valuable time and guiding this community health needs assessment process.

ARH in partnership with our communities will use this assessment to identify respective health concerns, measure the impact of current public health efforts and guide the appropriate use of local resources. We also hope that together, we can improve the health and well-being of the residents of Eastern Kentucky and Southern West Virginia.

Sincerely,

Joseph L. Grossman
ARH President and Chief Executive Officer
Appalachian Regional Healthcare

Appalachian Regional Healthcare is a not-for-profit health system serving 350,000 residents across Eastern Kentucky and Southern West Virginia. Operating 12 hospitals, multi-specialty physician practices, home health agencies, HomeCare Stores and retail pharmacies, ARH is the largest provider of care and single largest employer in southeastern Kentucky and the third largest private employer in southern West Virginia. The ARH system employs more than 5,000 people and has a network of more than 600 active and courtesy medical staff members representing various specialties. ARH is firmly committed to its mission of improving the health and promoting the well-being of all people in Eastern Kentucky and Southern West Virginia.

Today we operate hospitals in Barbourville, Harlan, Hazard, Hyden, McDowell, Martin, Middlesboro, Morgan County, South Williamson and Whitesburg, Kentucky, and Beckley and Summers County, West Virginia. ARH has always responded to the changing demands of rural healthcare. Over the years, we have built and acquired new facilities as well as invested in new technology and medical capabilities.

Mission

To improve health and promote well-being of all the people in Central Appalachia in partnership with our communities.

Vision

To provide unparalleled experience as the most trusted home for healthcare.

Value Statement

Patient and family experience is our number one priority.
Appalachian Regional Healthcare contracted with the Community and Economic Development Initiative of Kentucky (CEDIK) in the fall of 2018 to conduct a Community Health Needs Assessment (CHNA) in accordance with the Affordable Care Act (ACA). The Affordable Care Act (ACA), enacted March 23, 2010, added new requirements that hospital organizations must satisfy in order to be described in section 501(c)(3), as well as new reporting and excise taxes.

The IRS requires hospital organizations to complete a CHNA and adopt an implementation strategy at least once every three years. This CHNA was the third prepared by CEDIK for this organization; prior reports were completed in 2013 and 2016. Here is an overview of the CHNA process that CEDIK uses based on the IRS guidelines:

**Community Health Needs Assessment (8-12 months)**
- Meet with the hospital administration steering committee to provide an overview of the CHNA process
- Work with hospital to create community steering committee

**Data Compilation**
- Meet with community steering committee
- Conduct focus group with steering committee
- Disseminate surveys
- Conduct additional focus groups
- Compile community economic and health profile
- Collect hospital utilization data
- Debrief with community steering committee

**Needs and Prioritization**
- Identify needs from surveys, focus group discussions, health and hospital data
- Work with hospital steering committee to prioritize needs
- Facilitate discussion about implementation strategies
- Create final CHNA report
- Bring to Board of Directors for approval
Goal: Support local groups and events that have a mission to address tobacco prevention, and improve tobacco cessation efforts through community education and advocacy.

ARH Our Lady of the Way partnered with Kentucky Cancer Program on Plan to Be Tobacco Free as a tobacco cessation strategy. We also provided Freedom From Smoking classes to more than 50 participants, and provided tobacco education to second and fifth grade students in the Floyd County School System.

We coordinated with the City of Martin to implement a tobacco free/vape free ordinance for the city. Ordinance was implemented June 2018.

We have maintained active participation in the following coalitions: Alcohol, Substance Abuse, and Policy Board (ASAP), Communities Against Drug Addiction (CADA), and the Floyd County Tobacco Coalition.

Goal: Increase available resources, including information on services, to address consequences of negative health outcomes related to diabetes, poor diet, and lack of exercise.

We have worked to promote hospital programs that benefit the community (bariatric services, diabetes, wellness, etc.), as well as offered free community education programs on healthy eating and living, which include classes on diabetes and weight management.

Our team worked to organize and lead monthly Floyd County Fitness and Nutrition Coalition meetings.

ARH Our Lady of the Way actively participates in and promotes support of disease management, treatment, and survivorship (i.e. Relay for Life, 5K Walk/Run for Diabetes, Walk with a Doc, Walking Clubs).

Our greatest success...

We coordinated with the City of Martin to implement a tobacco free/vape free ordinance for the city. The ordinance was implemented June 2018.
Goal: Provide programs that focus on heart disease prevention, related to tobacco use as well as diet and exercise.

We were asked to participate with American Heart Association in developing and implementing programs to educate females in Eastern Kentucky about the risk factors, prevention and treatment of heart disease.

We began weekly walking clubs in the Martin and Wayland communities. We have provided Gentle Chair Yoga for All in the communities of Langley, Prestonsburg, McDowell and Martin.

We partnered with the Floyd County Community Early Childhood Council to provide nutrition and health education to parents of children under the age of six. We presented nutrition education to third and fourth grade students in the Floyd County School System.

Participated in the Big Sandy District Cancer Council Forum regarding the assessment of the health status of Kentucky.

ARH Our Lady of the Way staff wears pink for Breast Cancer Awareness Month in October.

ARH Our Lady of the Way conducts a Community Health Needs Assessment every three years. We are excited to share our progress from the last assessment, as we prioritize our next goals based on recent community input.

Thank you for your continued support of ARH Our Lady of the Way.

Kathy Stumbo
Community CEO, ARH Our Lady of the Way

Introduction

ARH Our Lady of the Way

ARH Our Lady of the Way is a Critical Access Hospital (CAH) located in Martin, Kentucky. It is one of three hospitals operating in Floyd County. ARH Our Lady of the Way is designated as a rural CAH with 25 Medicare certified beds. The hospital serves Floyd and surrounding counties. In addition to the hospital, ARH Our Lady of the Way operates four rural health clinics. The hospital employs 140 individuals.

The hospital, Our Lady of the Way was founded in 1947. In July 2018 it became known as ARH Our Lady of the Way Hospital.

Services

- 24/7 Emergency Care
- Anticoagulation Clinic
- Cardiopulmonary Services
- Digital Mammography
- General Surgery
- Imaging
- Primary Care
- Rehabilitation Care (OT, PT and Speech)
- Senior Renewal Center (outpatient counseling services)
A Portrait of the Community Served by ARH Our Lady of the Way

- Martin, Kentucky sits within Floyd County; the county seat is Prestonsburg. The county, founded in 1800, is named for Colonel John Floyd (1750–1783).
- Located in the coal, oil and natural gas fields of Eastern Kentucky, Floyd County is part of the Cumberland Plateau of the Appalachian Mountain range and consists of 393 square miles.
- The county’s public schools are operated by the Floyd County School District.
- The Mountain Arts Center, Jenny Wiley Amphitheater, East Kentucky Science Center and Planetarium and the Ranier Racing Museum are among some of the recreational interest points in Floyd County.
Assessment Process

The assessment process included collecting secondary data related to the health of the community. Social and economic data as well as health outcomes and providers data were collected from secondary sources to help provide context for the community (see below). In addition, CEDIK compiled hospital utilization data to better understand who was using the facility and for what services (next section). Finally, with the assistance of the Community Steering Committee, input from the community was collected through focus group discussions and surveys.

First we present the demographic, social, economic and health outcomes data that were compiled through secondary sources. These data that follow were retrieved from County Health Rankings February 2019. For data sources see appendix.

The Community Steering Committee

The Community Steering Committee is a vital part to the CHNA process. These individuals represent organizations and agencies from the service area and in particular, the individuals who were willing to volunteer enabled the hospital to get input from populations that were often not engaged in conversations about their health needs. CEDIK provided a list of potential agencies and organizations that would facilitate broad input.

The Community Steering Committee met twice as a group. At the first meeting, hospital representatives welcomed and expressed appreciation to committee members for assisting with the CHNA process. In order to allow open discussion, hospital representatives then excused themselves to allow the focus group to be conducted. At the second and final committee meeting, hospital representatives joined the conversation to hear the data results.

Community Feedback

In order to collect primary data from community residents, focus groups and key informant interviews were conducted in Floyd County and in the area that ARH Our Lady of the Way patients reside. Focus groups were conducted as separate meetings or in conjunction with other regularly scheduled meetings in the county. Forty-nine individuals participated in three focus groups. Representation from the Floyd County Fitness and Nutrition Coalition, Graceway United Methodist Church, Floyd County School System, local providers and underserved populations in the service area were invited to share their thoughts, opinions and health care needs. Below is an aggregated list of ideas generated from all focus groups.

Focus Groups

Resident’s vision for a healthy community

- Affordable transportation
- Access to care – specialists, dental and eye care
- Education on available resources
- Affordable housing
- No smoking or vaping
- Health literacy
- Nutrition Education
- Access to affordable fresh foods
- Healthy economy/Jobs
- Opportunities for entertainment and recreation
- Mental health resources
- Fitness opportunities
- YMCA
- Walkable community
What are the most significant health needs in Floyd County?

- Transportation
- Grandparents raising grandchildren
- Health illiteracy
- Tobacco and vaping
- Mental health – stigma
- Substance abuse
- Hepatitis A, B and C
- Services for elderly
- Homelessness
- Diabetes
- Directing and linking resources
- Uninsured and underinsured
- After hours care
- Heart disease
- Cancer
- Wellness education (Fitness and nutrition)
- Obesity
- Black lung
- Healthy foods
- Access to affordable healthy foods

What is your perception of the current health care system including hospital, health department, clinics, physicians, EMS and other essential services* in Floyd County? (*Essential services include public utilities, access to healthy food, access to housing, etc.)

Responses sorted into strengths and opportunities for improvement in the health care system.

Strengths of the health care system in Floyd County

- Healthcare providers are better at tracking prescriptions
- Great veterans clinic
- Healthcare has improved
- Fantastic labs
- Strong community partnerships
Opportunities for improving the health care system in Floyd County

- Lack of EMS county wide
- Nursing shortages
- Need for specialists – OB/GYN, psychiatry, endocrinology, neurology, oncology, pediatrics, pulmonology
- Perception that larger hospitals have better care causing people to travel for care
- Accessibility of appointments
- Cost of insurance/lack of insurance providers
- Need more health education in schools

What can be done to better meet health needs of residents in Floyd County?

- Support for prescriptions/medical supplies
- More specialty services
- Collaboration with other organizations and groups
- Effective communication of services
- Broadband and internet accessibility
- Advertising hospital services
- Public transportation
- Accessible community centers
- Extended hours for clinics

**Key Informant Interviews**

As a mechanism to examine needs that surfaced in focus group discussions, the hospital leadership and the steering committee provided contact information for potential key informant interviews to be conducted. Two interviews were held and below is a summary of the responses highlighting the strengths of the community, challenges/barriers in the broader health care system and opportunities for improving the community’s health.

Most significant or common needs in Floyd County (related to health)?

- Drugs
- Cancers
- Diabetes
Strengths of health care system in Floyd County

- Skilled physicians, nurses, and resource providers
- Greater availability to specialized services
- Large variety of providers
- Quality hospitals
- Caring staff

Barriers to health care or living healthy in Floyd County

- Transportation
- Lack of knowledge about health and healthcare
- Finances

What could be done to better meet Floyd County residents health needs?

- Drug education for community
- Change perception of quality of local services
- Increase availability of services for seniors
- Better market current resources and services offered by ARH
- Support groups
- Quality housing
Winter 2018 Survey Results

247 Surveys*

- 72% Households are satisfied with their ability to access health care services in their county.
- 89% Respondents have a family doctor. 79% visit their family doctor regularly.
- 7% Households are currently without health insurance.

Where respondents who do not have a family doctor go most often for healthcare:

- I do not receive routine healthcare*: 33%
  - Can't take off from work (29%), can’t afford it (29%), no specialist in my community (5%), no transportation (5%), no appointment available (2%).

Top three health challenges households face:

- High blood pressure: 23%
- Overweight/obesity: 18%
- Diabetes: 16%
- Heart disease and stroke: 11%
- Other: 8%
- Cancer: 6%
- Mental health issues: 7%
- Respiratory/lung disease: 7%

Routine health care accessed by respondents:

* Not all survey respondents answered every question. Respondents = total number of responses for each question; Households = questions where respondents were asked if “anyone in their household” were impacted.

Respondent’s rating of their personal health (red bar) and the overall health of the people in this county (gray bar).
Hospitals* visited in the last 24 months by households:

*Why another hospital? 
Physician referred me (36%), service I needed was not available (34%), I prefer larger hospitals (10%), insurance requires me to go elsewhere (8%).

Households that have used a hospital in the past 24 months:

How far respondents have to travel to see a specialist. 51% would be willing to use telehealth services for specialty care.

Top three most important factors for a healthy community:
Prioritization of Identified Health Needs

To facilitate prioritization of identified health needs, a ranking process was used. Health needs were ranked based on five factors:

1) The ability of Appalachian Regional Healthcare to evaluate and measure outcomes.
2) The number of people affected by the issue or size of the issue.
3) The consequences of not addressing this problem.
4) Prevalence of common themes.
5) The existence of hospital programs which respond to the identified need.

Health needs were then prioritized taking into account their overall ranking, the degree to which Appalachian Regional Healthcare can influence long-term change, and the impact of the identified health needs on overall health.

Appalachian Regional Healthcare convened as a system and within each individual facility to develop the implementation strategy after priorities were discussed.

Appalachian Regional Healthcare will continue to work with the community to execute the implementation plan and realize the goals that have been positioned to build a healthier community – a healthier Kentucky and West Virginia.
Implementation Strategy

**Tobacco Use/Vaping**

Goal: To address tobacco use & vaping prevention with the support of local groups and events, community education, tobacco cessation classes, and screenings.

- Continue to collaborate with local health department to address tobacco/vaping prevention in Floyd County.
- Offer education, screenings and information on tobacco use/vaping to inform prevention efforts. Annually identify a minimum of three opportunities (i.e. health fairs, lunch and learn seminars, workshops, news articles or interview, presentations) to provide education or screening to community members on all forms of tobacco use/vaping to promote tobacco prevention.
- Continue providing tobacco cessation efforts aimed at youth under age 18.
- Continue to provide smoking cessation (Freedom From Smoking) classes in the community.
- Continue to provide low dose CT lung screenings for eligible patients.
- Continue tobacco assessments in all areas (i.e. med/surg, ER, and primary care clinics.

Community Partners: Floyd County Health Department, Floyd County Tobacco Coalition, Floyd/Pike Agency for Substance Abuse Policy, Floyd County Schools.

**Substance Abuse**

Goal: To support substance abuse prevention and treatment in partnership with local groups, events, and community education in an effort to reduce substance abuse/misuse in Floyd County.

- Continue collaboration with community partners to address substance misuse in Floyd County.
- Continue to support and promote the Floyd County Health Department syringe exchange program.
- Educate staff on proper terminology to help reduce stigma.
• Ensure all primary care providers and clinics are compliant with safeguards to help prevent addiction (to include KASPER, referrals to pain management and alternate therapies).

• In an effort to prevent addiction, continue to provide alternate therapies (physical therapy, etc.) to opioids for pain relief of inpatient population.

• Educate staff and community members on the rapid increase of hepatitis and HIV in Floyd County. Also offer hepatitis series vaccines to all staff.

Community Partners: Floyd County Health Department, UNITE, Mountain Regional Prevention Center, Floyd/Pike ASAP, Floyd County Schools, Big Sandy Neonatal Abstinence Syndrome Coalition.

**Obesity**

Goal: To promote healthy options for diet and exercise to prevent negative health outcomes.

• Continue collaboration with community partners to address substance misuse in Floyd County.

• Offer education, screenings and information on diet and exercise to inform prevention efforts. Identify opportunities (health fairs, lunch and learn, seminars, workshops, news articles or interviews, presentations, community cooking classes) to provide education or screening to community members on diet and exercise (prenatal, heart disease, cancer, diabetes) to aid in prevention of negative health outcomes. Educate staff on proper terminology to help reduce stigma.

• Support hospital dietitian efforts for patient education.

• Administer chronic care management referrals for patients in the hospital, ER and primary care clinics.

• Continue to offer free weigh in and blood pressure checks in the Emergency Department.

Community Partners: Floyd County Health Department, Floyd County Fitness and Nutrition Coalition, Floyd County Diabetes Coalition, Floyd County Community Early Childhood Council.
Next Steps

This Implementation Strategy will be rolled out over the next three years, from Fiscal Year 2020 through the end of Fiscal Year 2022.

Appalachian Regional Healthcare will kick off the implementation strategy by initiating collaborative efforts with community leaders to address each health priority identified through the assessment process.

Periodic evaluation of goals/objectives for each identified priority will be conducted to assure that we are on track to complete our plan as described.

At the end of Fiscal Year 2022, Appalachian Regional Healthcare will review the implementation strategy and report on the success experienced through the collaborative efforts of improving the health of the community.

Floyd County Community Health Needs Assessment Survey

1. Please tell us your zip code: __________

2. Are you or anyone in your household satisfied with the ability to access healthcare services in Floyd County?
   ○ Yes
   ○ No

3. Do you have a family doctor?
   ○ Yes
   ○ No

4. If yes, do you visit regularly?
   ○ Yes
   ○ No

5. If no, where do you go most often for healthcare? Please choose all that apply.
   ○ Emergency room
   ○ Health department
   ○ Urgent care center
   ○ Other. Please specify: ____________
   ○ I do not receive routine healthcare

6. If you answered "I do not receive routine healthcare" above, please select all that apply as to why:
   ○ No appointment available
   ○ No specialist in my community
   ○ No transportation
   ○ Cannot take off from work
   ○ Cannot afford it
   ○ Other. Please specify: ____________

7. Have you or someone in your household used the services of a hospital in the past 24 months?
   ○ Yes
   ○ No

8. If yes, where did you visit a hospital?
   ○ Our Lady of the Way
   ○ McDowell
   ○ Lexington
   ○ Highlands
   ○ Pikeville
   ○ Ashland
   ○ Paintsville
   ○ Other. Please specify: ____________

9. Please select the top THREE health challenges you or anyone in your household face:
   ○ Cancer
   ○ Diabetes
   ○ Mental health issues
   ○ Heart disease and stroke
   ○ High blood pressure
   ○ HIV/AIDS/STDs
   ○ Overweight/obesity
   ○ Respiratory/lung disease
   ○ Other. Please specify: ____________

10. Are you or anyone in your household without health insurance currently?
    ○ Yes
    ○ No
11. Have you or someone in your household used any of the specialty services below in the past 24 months?

<table>
<thead>
<tr>

12. If you went to another hospital than an ARH hospital, please select all that apply as to why:

- [ ] Service I needed was not available
- [ ] My physician referred me
- [ ] My insurance requires me to go somewhere else
- [ ] I prefer larger hospitals
- [ ] Other. Please specify:____________________

15. In the past 24 months, have you had a:

- [ ] Routine physical
- [ ] Mammogram (Women)
- [ ] Pap Smear (Women)
- [ ] PSA (Men)
- [ ] Colonoscopy

13. How far do you or anyone in your household travel to see a specialist?

- [ ] Less than 20 miles
- [ ] 20-49 miles
- [ ] 50-100 miles
- [ ] More than 100 miles
- [ ] I do not see any specialists

14. Would you be willing to utilize telehealth services to reduce travel time for specialty care?

- [ ] Yes
- [ ] No

16. How would you rate your own personal health?

- [ ] Very healthy
- [ ] Healthy
- [ ] Neither healthy nor unhealthy
- [ ] Unhealthy
- [ ] Very unhealthy

17. How would you rate the overall health of the people in Floyd County?

- [ ] Very healthy
- [ ] Healthy
- [ ] Neither healthy nor unhealthy
- [ ] Unhealthy
- [ ] Very unhealthy
18. Overall, how would you rank your local ARH hospital on a scale of 1 to 10, where 1 is “not very good” and 10 is “very good”? (Please check your answer)

1  2  3  4  5  6  7  8  9  10
○ ○ ○ ○ ○ ○ ○ ○ ○ ○

19. Please select the top THREE most important factors for a “Healthy Community?” Choose only three:

○ Good place to raise children
○ Low crime/safe neighborhood
○ Good school systems
○ Easy access to healthcare
○ Community activities and events
○ Affordable housing
○ Low disease rate
○ Personal responsibility
○ Diverse community
○ Good jobs/healthy economy
○ Religious or spiritual values
○ Transportation
○ Parks and recreation
○ Access to internet/technology
○ Other. Please specify:___________________

20. Do you think Floyd County meets those factors?

○ Yes
○ No

21. Would you recommend your local ARH hospital to friends and family?

○ Yes
○ No

22. What is your age?

○ 18-24
○ 25-39
○ 40-54
○ 55-64
○ 65-69
○ 70 or older

23. What is your gender?

○ Male
○ Female

24. What is the highest level of education you have completed?

○ High school
○ College or above
○ Technical school
○ Other. Please specify:___________________

25. What is your current employment status?

○ Unemployed
○ Employed part-time
○ Employed full-time
○ Retired
○ Other. Please specify:___________________
RESOLUTION ADOPTED BY THE
BOARD OF TRUSTEES OF
APPALACHIAN REGIONAL HEALTHCARE, INC.

ARH Community Health Needs Assessment Reports

The following resolution was adopted at the meeting of the Board of Trustees of Appalachian Regional Healthcare, Inc. (the "Company"), on May 10, 2019, and has not been amended or rescinded since that date:

WHEREAS, Appalachian Regional Healthcare, Inc. (the "Company"), has completed the Community Health Needs Assessment process; and

WHEREAS, the Company has presented implementation strategies to address the identified priorities from each ARH community; and

WHEREAS, the Company desires to work in partnership with each of its local communities in addressing these identified issues over the next three years.

NOW, THEREFORE, BE IT RESOLVED:

1. ARH Management is hereby directed to implement the outlined strategies that address the identified needs from the assessment over the next three years.

2. The appropriate facility staff, as directed by the President and CEO, shall work with their respective community partners to complete the various activities outlined in the community needs assessment implementation plans.

3. The officers of the Company, as directed by the President and CEO, subject to all applicable State and Federal laws, are hereby authorized to take such further action and execute such documents as they deem necessary and proper, in their discretion, to carry out the foregoing resolution.

4. These aforesaid authorizations shall be subject to ongoing review by the Board of Trustees, and may be amended from time to time based upon immediacy of need and availability of necessary resources.

The foregoing resolution is adopted by the Board of Trustees of Appalachian Regional Healthcare, Inc. on this the 10th day of May, 2019.
